

**Dictate on your
smartphone.**

**ZyDoc completes your
EHR note.**

Discover the most efficient system of EHR charting for athenaClinicals users

Our HIPAA-compliant, smartphone transcription application with EHR integration enables providers to select a patient from their schedule, choose a job-type template and dictate highly accurate clinical notes that are seamlessly inserted into the appropriate sections of athenaClinicals.

Scribes are expensive

Using scribes to populate athenaClinicals is too costly for most practices.

Speech recognition is complex

Fifty percent of clinicians who complete training abandon it and there are critical errors.

Keyboard & mouse is inefficient

Providers are tethered to their screen while manually typing up documentation.

ZyDoc is EASY!

ZyDoc enables athenaClinicals users to complete their notes quicker and faster than all other documentation methods.

Trusted by Leading Medical Practices, ASCs & Hospitals Nationwide Since 1993

1

61%

According to an NIH-sponsored study, ZyDoc is 61% faster than using a keyboard & mouse to complete clinical notes

2

99.6%

Our Enterprise Plan guarantees a transcription accuracy rate of at least 99.6%

3

24/7

ZyDoc's award-winning, US-based customer service team is available whenever you need support

+

No training required

Start creating robust clinical notes on day one with our dictation-based application that leverages pre-loaded templates and expanded text

Flexible dictation options

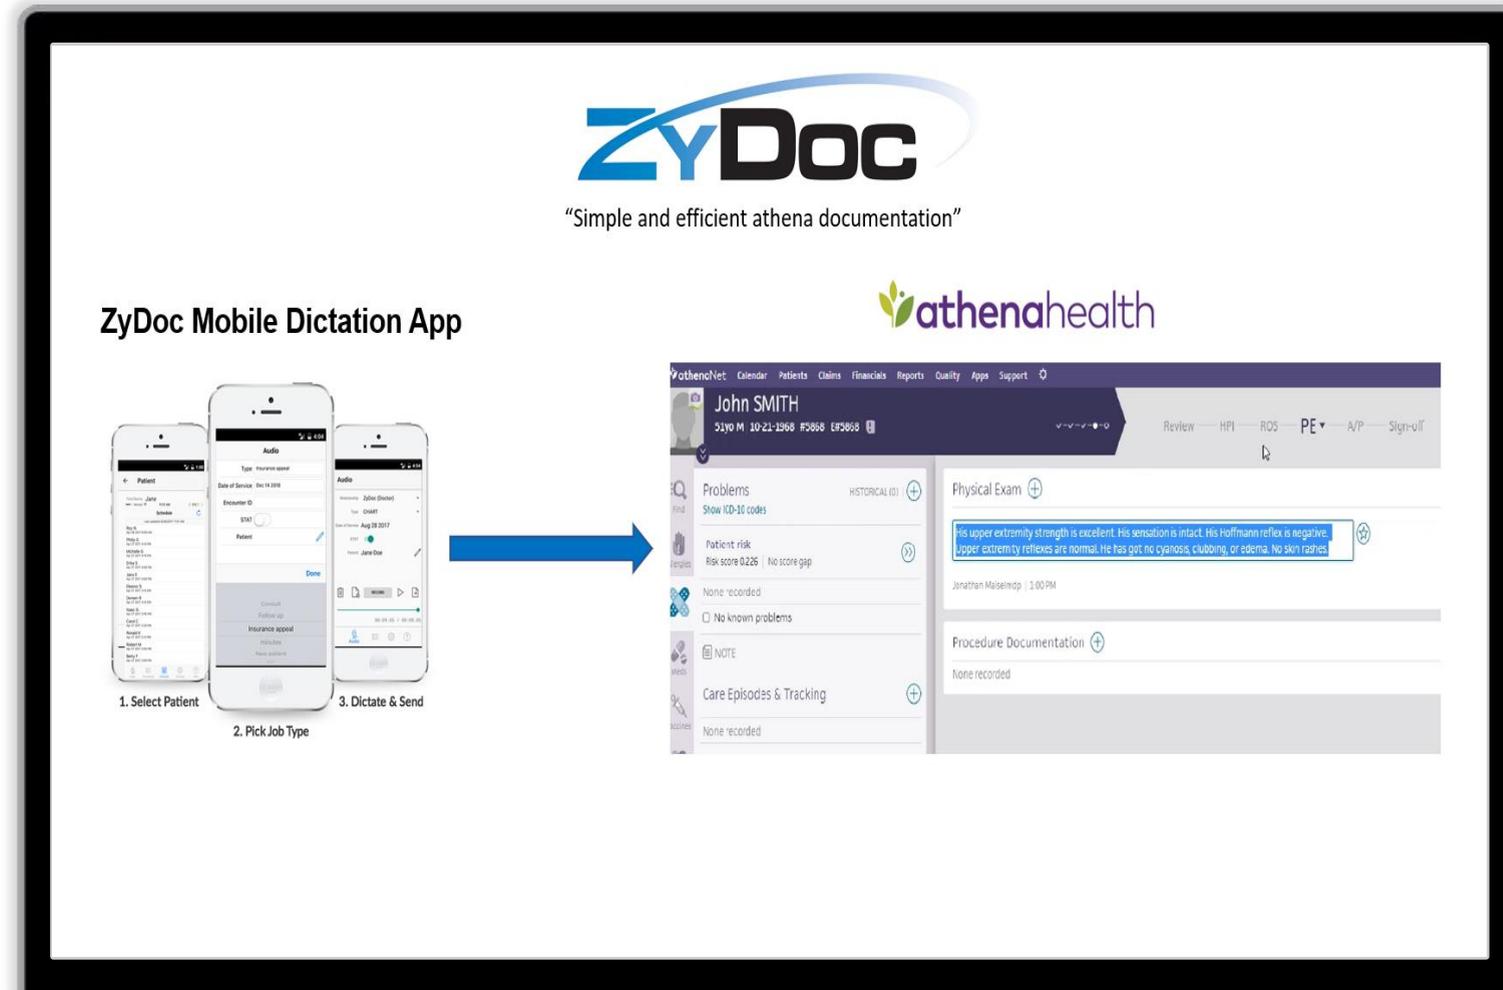

You can use your smartphone, tablet, telephone or digital recorder to capture your notes on-the-go

Works with all specialties

We have worked with hundreds of providers in all specialties and can provide guidance on optimizing your templates

Complete athenaClinicals notes quickly, easily and accurately

Dictate

Doctors can dictate anytime, and from anywhere by smartphone, digital recorder, tablet or telephone

Transcription

Our specialty-specific medical typists and editors transform dictation files into highly accurate documentation

EHR Insertion

Transcribed documents are inserted into the appropriate sections of athenaClinicals
