

## **ZyDoc Medical Transcription Collaborates in NYSTAR Long Island Regional Innovation Partnership**

*ZyDoc Medical Transcription, a technical leader in medical transcription and Electronic Medical Records (EMR) has endorsed The New York State Office of Science, Technology and Academic Research (NYSTAR) Regional Partnership program. This initiative, designed to strengthen and improve the ability of emerging and established technology-related companies to grow and prosper in New York State, focuses upon technology commercialization.*

Hauppauge, NY (PRWeb) February 27, 2007 -- ZyDoc announced that they will collaborate in the NYSTAR Long Island Regional Innovation Partnership Proposal. As a software development company and business services provider, ZyDoc recognizes the fundamental importance of technology development, commercialization, and dissemination for a regional economy. We realize that we must develop and grow our own new ventures and work together to retain emerging ventures locally in order to capture the economic benefits of their growth, which we want to expand. It is also important to ensure that new technologies that offer efficiency and competitiveness benefits are available to all of our companies and economic entities.

James M. Maisel, M.D., Chairman of ZyDoc states, "ZyDoc is an award-winning software development company. Our speech recognition and business productivity software and services are widely disseminated throughout the medical industry. These services are used on a daily basis by physicians to enhance the efficiency, lower cost, and improved outcomes for thousands of patients encounters daily with secure web-based medical records. Our company provides infrastructure support for numerous individual physicians, medical groups, ambulatory surgical practices, and hospitals in Long Island and now across the nation. We have experienced doubling of our growth in each of the past two years and anticipate further acceleration in the future."

Dr. Maisel further elaborates, "Stony Brook University has assembled an extraordinary large, powerful, and impressive group of public and private sector economic development organization and partners together. Under the leadership of the Center of Excellence in Wireless and Information Technology, the program's critical goals will create tremendous resources. ZyDoc focuses on the technology development and applications phases of the technology commercialization process. We pledge to the achievement of the Regional Partnership Program's important goals or resources for expertise to evaluate technological validity and workforce training."

About Stony Brook's Center of Excellence in Wireless and Information Technology (CEWIT)

The Center of Excellence In Wireless and Information Technology (CEWIT) was created in 2003. The Center is a next generation research and educational facility whose vision is four-fold: become recognized as a world leader in wireless and IT, conduct first-class interdisciplinary research in the emerging, critical technologies of the information age, address the skilled technology worker shortage, and foster new enterprise development.

Over the last four years, the Center has worked hard to build strategic alliances and business partnerships among the academic, scientific, and business communities. Our partners include some of the world's best known and most sophisticated giants of wireless and information technology including IBM and Cisco Systems. The Center is building on these past achievements and has lay the foundation for R&D partnerships with its partners and sponsors.

About ZyDoc Medican Transcription:

Founded in 1993, ZyDoc is a full-service e-transcription company featuring HIPAA compliant web-based records, e-signature, faxing, and legacy integration solutions. Physicians, transcription companies, and hospitals use these services to produce, organize, and distribute multispecialty patient electronic medical records (EMR) in regional health information networks (RHIO). ZyDoc solves the PC literacy, data entry bottleneck, implementation, and cost issues that plague other clinical documentation EMR companies. The company uses award-winning transparent embedded technology that leverages front and back-end speech recognition, workflow enhancements, and the Internet with ASP applications. ZyDoc is a development partner with SUNY Computer Sciences at Stony Brook, an Olympus authorized distributor, and an IBM Speech Premiere Business Partner. In 2004, ZyDoc was ranked third nationally in medical transcription by the Medical Records Institute.
