ZyDoc Announces VAR Agreement with Hippocratic Solutions for Turnkey Medical Documentation, Analytics, and Billing Services for Practice Fusion EHR

Islandia, NY, September 5, 2013 – [ZyDoc](#), an Islandia, NY-based e-transcription and medical informatics company, has announced a new VAR agreement with Hippocratic Solutions, a state-of-the-art medical billing service and Premier-level Practice Fusion™ EHR Consultant. Clients of ZyDoc and [Hippocratic Solutions](#) now have turnkey access to an integrated suite of services from transcription to revenue cycle management (RCM) that facilitate the transition to EHRs and ICD-10, and allow doctors to concentrate on clinical responsibilities instead of data entry and RCM.

ZyDoc's web-based transcription services, combined with its patent-pending MediSapien™ natural language processing (NLP) technologies, enable physicians to dictate encounters for automated insertion as coded, structured data into all major EHRs, including Practice Fusion, for billing, reporting, and analytics. Integrated billing services from Hippocratic Solutions leverage the value of transcribed reports by providing an efficient RCM solution for doctors using dictation.

James Maisel, MD, Chairman of ZyDoc, states, "We are pleased to offer physicians an easy transition to the free Practice Fusion EHR and facilitate eligibility for \$16,000 EHR meaningful use payments for 2013. The doctors can dictate with no change in work habits using digital

recorders, smartphones or telephones, and have a fully documented encounter appear in Practice Fusion EHR. We are pleased to offer these clients Hippocratic Solutions full-service billing as a tightly integrated VAR solution allowing physicians to concentrate on their patient care and rely on turnkey operations.”

According to Peter Koukounas, Hippocratic Solutions, “We are delighted to be able to work with ZyDoc to provide turnkey documentation and billing services for our clients. When doctors use ZyDoc, we obtain a detailed encounter in the Practice Fusion EHR that allows Hippocratic Solutions to justify the highest level of encounter for the practice billing submission. We also appreciate the computer-assisted coding of the encounter provided by MediSapien that will help us deal with the ICD-10 transition.”

ZyDoc’s award-winning web-based medical transcription infrastructure integrates with MediSapien to empower doctors to work efficiently dictating their encounters rather than performing tedious mouse and keyboard EHR data entry. MediSapien is an enterprise-class web-based platform from ZyDoc for conversion of unstructured text into fully coded structured data. The fully coded structured output is optimized for insertion into EHRs, and facilitates Meaningful Use Stage II compliance. MediSapien also performs computer-assisted coding (CAC), including ICD-9, ICD-10, SNOMED-CT®, LOINC®, and RxNorm, for revenue cycle management (RCM) companies, and data mining optimized for health data analytics and interoperability.

About Hippocratic Solutions

Hippocratic Solutions provides full revenue cycle management services to physicians all across the United States. As a successful medical billing company with a full team of experts in place, we are confident that our company is one of the most technologically advanced in the business that can successfully fulfill all your medical billing requirements. Hippocratic Solutions is a Premier-level Practice Fusion Consultant and prides itself on ensuring the most accurate, detailed and efficient medical billing and coding practices.

About ZyDoc and MediSapien

ZyDoc, based in Islandia, NY, was founded in 1993 to develop medical informatics technologies. ZyDoc has developed award-winning e-transcription infrastructure and speech recognition solutions.

Augmenting its transcription business, ZyDoc launched MediSapien, an NLP-powered web-based platform that converts unstructured text to fully coded structured data for EHRs, analytics, and reporting. The MediSapien Knowledge Management Platform is powered by disruptive patent-pending proprietary technologies, and NLP technology from Health Fidelity, and supports independent application developers. For clinician end-users, MediSapien can be utilized in conjunction with existing or planned EHR installations, and can facilitate compliance with Meaningful Use mandates. ZyDoc is a certified reseller of the Philips SpeechExec Enterprise Solution, and a Speech Processing Solutions partner.
