

ZYDOC IMPROVES CLINICAL WORKFLOWS, OPTIMIZES ATHENA CLINICALS

ZyDoc Medical Transcription has reduced the documentation burden faced by Paradigm Orthopedics & Sports Medicine, resulting in the ability to see more patients, generate better records and decrease overhead costs.

Challenge:

- Inefficient workflow
- Lack of interface with athenaClinicals®
- Excessive time spent on cut-and-paste EHR charting

Impact:

- Extensive staff work hours
- Loss of revenue
- Less time with patients

Solution:

- ZyDoc's award-winning, mobile-friendly medical transcription services with athenaClinicals® interoperability

Results:

- Improved workflow
- Improved quality of health record. Avg TAT of 3.75 hrs.
- Eliminated time-consuming cut-and-paste behavior

“The ZyDoc interface with athenaClinicals took only a few hours.”

A Hands-On Approach to Care

The physicians at Paradigm Orthopedics and Sports Medicine strongly emphasize a hands-on approach. From initial patient contact and personalized testing to diagnosis and treatment, doctors are intimately involved with every aspect of care. Widely respected nationwide for their experience and clinical expertise, the Paradigm team includes experts dedicated to general orthopedics, orthopedic surgery, orthopedic spine surgery, and sports medicine. Pursuing patients' health is their passion as well as providing innovative techniques and treatments.

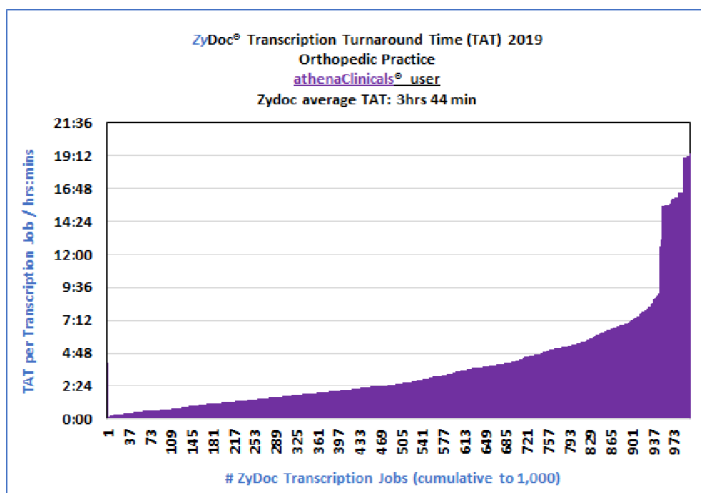

Figure 1

Cut-and-Paste Charting Caused Long Work Hours

When the doctors at **Paradigm Orthopedics & Sports Medicine** started with ZyDoc they were only dictating parts of exams and then copying and pasting into the EHR. The practice was extremely busy, causing increased workloads. As a result, doctors and staff were routinely working late into the evening.

Dictation and Section Level EHR Insertion

- **Fastest for Doctors**
- Cloud-Based
- Fits into workflow
- Easy to use
- Less complex
- Least expensive

Efficient Workflow, athenaClinicals® Optimization

In 2016, ZyDoc Medical Transcription implemented an athenaClinicals interface and now Paradigm's reports are automatically inserted into the patient encounter. The portion of the notes dictated by the doctors provides an enriched detailed health story that reflects the doctor's expertise and encourages new referrals. The setup time for ZyDoc's implementation with AthenaClinicals only took a few hours. Now the average orthopedic job turn-around time is 3 hours 44 minutes. (figure 1).

Today, the Paradigm doctors are focused on what they do best – providing high-quality orthopedic care to their patients. Leveraging an efficient workflow, the doctors dictate on smartphones - even while in the room with a patient, and ZyDoc Medical Transcription then seamlessly completes their charts. (figure 2)

“Our new interface is working effortlessly and is making the clinical staff’s work much easier.”
